MONTHLY STATISTICAL SUMMARY OF WESTERN AUSTRALIA

NOVEMBER 1968

NOTES

1. Statistics shown in this publication are the latest available at the date of preparation. Many of the figures appearing in this Summary are therefore preliminary and may be amended in subsequent issues. Reference should therefore always be made to the latest available issue.
2. Several tables contain figures which have been rounded (to thousands or, in some cases, millions), without making those adjustments which would be needed to make the rounded figures add to the rounded total. It is for this reason that figures do not always add to the totals shown in the tables.
3. Population estimates for 30 September 1967 were the first to be made for a date subsequent to the repeal of section 127 of the Australian Constitution, which required that 'in reckoning the numbers of the people of the Commonwealth, or of a State or other part of the Commonwealth, aboriginal natives shall not be counted'. Accordingly, current estimates no longer exclude full-blood Aborigines. The estimates of population for dates earlier than 30 September 1967 also include all Aborigines.

Vital statistics also are now compiled on a basis which includes vital events among the whole population, including Aborigines. These statistics were first prepared in respect of the March quarter 1967, statistics for earlier periods remaining on the old basis.
4. The employment estimates shown on page 8 in this publication are not directly comparable with statistics derived from the 1966 Population Census, for which new work force definitions were adopted. A new series of estimates for June 1966 and subsequent months will be published as soon as possible. This new series will be based on 1966 Census benchmarks and will therefore be at a higher level than the present series. In due course the estimates for periods prior to the Census of June 1966 will be revised, but on a basis comparable with that of the 1961 Census benchmarks, the information needed to revise these benchmarks on the 1966 Census basis not being available.
5. Additional information may be obtained, if required, for many of the series published in this Summary by contacting the appropriate section of this Office (Telephone 21 8041).

(a) See Special Note below. (b) Rates for Perth. (c) Rates operative from beginning of first pay-period commencing in the month shown or commencing on or after the date shown.

SPECIAL NOTE - The latest wage rates shown in the 'State' section of the above table are those which applied before a decision of The Western Australian Industrial Commission dated 27 June 1967. The terms of this decision were that the minimum weekly wage payable to adult male workers under certain awards be increased from \$36.55 to \$37.55; 'that the wage rates for adult workers not in receipt of the "minimum wage" be increased by 60 cents per week; and that other wage rates be adjusted as if the basic wage for males and the basic wage for females had been increased by that amount'. These increases were declared to operate from the beginning of the first pay-period commencing on or after 1 July 1967. A further increase of \$1.35 a week for adult males and adult females was granted by the Industrial Commission in October 1968 to operate from the beginning of the first pay-period commencing on or after 25 October 1968. The latest wage rates shown in the 'Commonwealth' section of the table applied before a decision of the Commonwealth Conciliation and Arbitration Commission in June 1967 to eliminate basic wages and margins from its awards and to introduce total wages to operate from the beginning of the first pay-period commencing on or after 1 July 1967. Total wages for adult males and adult females were to be increased by \$1 a week from the same date. In October 1968 a further increase of \$1.35 a week for adult males and adult females was granted by the Commission to operate from the beginning of the first pay-period commencing on or after 25 October 1968.

(a) Most cargoes are recorded in terms of the ton weight of 2,240 lb but some cargo, consisting mainly of bulky commodities, is recorded on the basis of the ton measurement, a unit equivalent to 40 cubic feet of space. Statistics are compiled accordingly in terms of "tons weight" or "tons measurement". In order to provide a ready comparison, as in this table, of the volume of cargo discharged or shipped the amounts recorded in the two categories have been aggregated.
